

Three Nooks Farm Update – 20th April 2015

Alkane is pleased to confirm that it has received the Permission for Development from Staffordshire County Council for the extraction of underground gas for power generation at Three Nooks Farm.

The decision to Permit was made at the Staffordshire County Council Planning Committee at the meeting held in December 2014 and we have now received the formal Planning Permission and Section 106 Agreement.

Alkane currently have a full pipeline of projects for 2015 and so will delay the construction of this project until 2016/2017.

However we can confirm that we continue to monitor the site and over the course of the next 6 months will carry out the groundworks to reinstate the drill site.

Whilst there is no activity on site we do not intend to hold any more Liaison Group meetings but will recommence them in advance of construction works taking place.

For any queries relating to the Three Nooks Farm project, please email: [**nooksfarm@alkane.co.uk**](mailto:nooksfarm@alkane.co.uk)
