INFINIS ACQUIRES RE-GEN

Infinis Limited, the UK's largest independent generator of renewable power, announces the acquisition of RE-Gen, a 43.5MW biogas power generation business for £80 million on a debt-free basis, from Summerleaze, a privately-owned company.

RE-Gen has 43.5MW of current installed generation capacity, based on 24 sites with the potential for a further 20 MW of development.

Alan Lovell, Chief Executive at Infinis, said:

"RE-Gen adds to Infinis' scale and confirms its position as the UK's leading biogas generation company. Furthermore this acquisition will broaden our contractual relationships to cover all of the major UK landfill operators and provide opportunities to invest further as we seek to build additional renewable generation capacity."

Infinis was advised by Deutsche Bank, Merrill Lynch and Climate Change Capital
