### **Infinis announces commercial operation of A'Chruach Wind Farm**

Infinis Energy ("Infinis"), the UK's leading independent generator of renewable power, is pleased to announce that construction of its A'Chruach Wind Farm has been completed and the site is now fully operational.

The Wind Farm is located in Argyle and Bute, Scotland, and has an installed capacity of 43MW. The site consists of 21 Senvion turbines and power will be purchased by AXPO under a long term PPA.

Eric Machiels, Chief Executive of Infinis, said:

*"We are pleased to add the beautiful A'Chruach wind farm to our portfolio, having completed construction on schedule and on budget. A'Chruach becomes our largest wind farm and takes our installed operational onshore wind capacity to a total of 317MW."*

*"We are proud to be able to make a further significant contribution to reducing the UK's carbon emissions and look forward to making similar progress with our remaining 3 construction Wind Farms later in this financial year."*

### **Notes to Editors**

#### **About Infinis Energy:**

Infinis is the UK's leading independent generator of renewable power, operating a portfolio of landfill gas (LFG) and onshore wind plants across the UK.

We employ approximately 365 people across 137 operating sites with an aggregate generating capacity of 618MW, comprising, 121 LFG sites (301MW) and 17 onshore wind farms (317MW). Infinis has an onshore wind development portfolio with 92MW under construction.

Infinis has established a community development fund to benefit the local community. The wind turbines are expected to generate electricity for 25 years. The fund will be overseen by representatives from West Loch Fyne, Lochgilphead and Dunadd Community Councils.
